Vince, how are you I am Ralph Alameda N2XZN. I have a TH-78-A also
with a Kantronics KPC-3 TNC, The antenna is a home made 2 meter
ground plane. I use an IBM PS 1 computer with Paket 5.1 software and
I am still learning as each day goes by. Transmit is at 1200 baud
rate. There is a lot to learn especially the frequencies which you can
acquire the most connections with. I am fortunate to have a fellow
ham living 6 miles from me, and we can communicate and experiment.
I am still new, but if I can help you in any way please let me know.
Good Luck.

Looking for info on how to build a mouse interface. I need to engineer a mouse for a handicapped person without use of arms.

Any diagrams on how the inner working of a regular mouse works would be beneficial.

Rick
